

Jimi Hendrix

Here Comes The Sun
Studio Sessions 1970

This is again a disc I picked up in a fine independent record store. It's from the fine folks at Watchtower (WT 2003107) & features some stuff that I haven't seen on the site yet. I've checked the dates for each session & all seem to be good except for Track 18 (which I took right from the artwork)
