This Drifter bootleg-CD contains the whole unreleased remastered tracks that was supposed to be released together as the album "A Kick In The Head Is Worth Eight In The Pants" in 1973. The album has been rumoured to be rejected by their record company as "not good enough", although that seems not to be true. Anyway, the album was never released. On this CD are even the singles that were released in 1973 and never ended up on any regular album. "Wouldn't I Be Someone", "Elisa", "King And Country" and "It Doesn't Matter Much To Me" ended up on some "Best of" albums and on the "Tales" box from 1990.
