ljs_54 edit notes: audio cdr I received from taperpat was extracted with eac to wav and then edited with cool edit pro 2. A minor glitch was removed between tracks 9 and 10 and a couple of additional very minor glitches were removed. Most of the editing work involved trying to get the volume consistent between tracks and between channels. I also amplified the volume on some of Emmylou's banter which could not be heard well.

I transferred the wav to CDWAV and re-tracked it, compressed to flac, and double checked that were no sbe's.
