

Got this one from a friend some time ago. This seems to be the entire broadcast. The CD files were in CDA format and seem to have been transferred from vinyl. There's very minor surface noise at times. The most complete reference I was able to find was the "To The One She Loves" double vinyl, but there's only 19 tracks on it. Perhaps someone has more information, please share. The sound quality is quite good.

# Patti Smith
